Education

Bachelors of Science, Computer Science, Stevens Institute of Technology, *Hoboken, NJ*

May, 2020

GPA — 3.6

- **Relevant courses:** Algorithms, Data Structures, Database Management Systems, Agile Methods, Concurrent Programming, Operating Systems, Web Programming, Advanced Programming in UNIX, Compiler Design, Systems Administration
- **Senior Design, Computer Science**, *first place*: Along with my team, created machine learning computer vision model for a shipping solution by Zebra Technologies
- **Upsilon Pi Epsilon**, member: International Honor Society for the Computing and Information Disciplines

Skills

Programming: OOP, Java, C++, C, Python, Erlang, Rust, C#, .NET, Bash, JavaScript, Ocaml

Web & Cloud: AWS, GCloud, MySQL, Docker, HTML5, CSS

Misc. Tech: UNIX, Git, Linux, Windows, Trello, Emacs, L^AT_EX, VSCode

Experience

Software Engineer, DexGroup, *Remote*

June 2020 — Current

- Designed and implemented human-computer interfaces for 5+ Amazon and Wayfair warehouses and facilities
- Allowed floor workers much clearer access to data by creating live visualizing warehouse systems using Ignition software.
- Created visually comprehensive statistics to aid with system upkeep and utilization

Software Engineer, DexterityDB, *Hoboken, NJ*

Apr 2018 — May 2020

- Developed database storage engine which increased read speeds by up to 100x over InnoDB using Rust programming language
- Implemented a virtual filesystem which reduced file descriptor utilization from 1,000,000+ to 1.
- Reduced continuous integration costs by 40% by designing and creating Linux server systems to run a custom continuous integration pipeline integration tools written in Bash, Python, and R to provide on-demand binaries and running statistics as development progressed
- Implemented testing scripts to accelerate generation of data, moving us from manual to automatic statistics generation
- Handled DevOps tasks relating to our server system, providing expertise where others lacked in-depth understanding

Teaching Assistant, Stevens Institute of Technology *Hoboken, NJ*

Aug 2018 — May 2020

- Assistant for courses Systems Programming, Algorithms, Concurrent Programming, Database Management Systems, Intro to Web Development
- Created dozens of new assignments for 500+ students to nurture an understanding of the material
- Assisted students in gaining an understanding for the topics taught in class

Undergraduate Research Assistant, Stevens Institute of Technology, *Hoboken, NJ*

Sep 2018 — Dec 2018

- Explored the possibility of extending eBPF from the network interfaces down to storage mediums to increase disk IO
- Setup and maintained Ubuntu servers both for the head professor and for other researchers

Wireless Team Lead, MarketSource, Target Mobile *Princeton, NJ*

Sep 2015 — Nov 2016

- Managed new and existing accounts for thousands of Verizon Wireless, AT&T, Sprint, and Comcast XFINITY customers
- Maintained relations with Target management to ensure effective sales flow, fraud prevention, and organization
- Organized and maintained Target Mobile's inventory and assets

Projects

Zebra SmartPack, Senior Design, Stevens Institute of Tech. *Hoboken, NJ* (C++, Python, Bash) August 2019 — May 2020

- Worked together with senior design team over the course of 2 semesters
- Acted as systems administrator and development operations lead in support of software development subteams
- Created secure methods of connecting to an insecure system remotely
- Made possible the design and implementation of a machine learning model to identify and categorize types of shipping containers, using 2D and 3D computer vision technologies to generate information about shipping containers
